Summary

The position of a logistician has passed. Achievements: during the year I was able to find new permanent carriers and form new routes. This has significantly increased sales in the western regions and optimized delivery costs. He graduated from the Physical and Technical Lyceum and the National University "LP" almost with honors. At the end of 2021, he became interested in programming in order to change jobs. In IT, I am attracted by the opportunity to constantly develop, combine work with free time and be modern.
